Met-Pro Corporation Launches New Corporate Website

Harleysville, PA, February 1, 2012 –Met-Pro Corporation (NYSE: **MPR**), a leading niche-oriented global provider of product recovery, pollution control, fluid handling and filtration solutions, today announced the launch of the Company's new corporate website: www.met-pro.com.

This online initiative has been developed to strengthen Met-Pro's ability to communicate with investors, customers and business partners. It delivers a fresh, new look, intuitive and simple navigation, and offers a wealth of company, product and other information that will make it easier for visitors to search for and find the information they need.

Commenting on the new website, Raymond J. De Hont, Chairman, CEO and President of Met-Pro Corporation, said "Our new corporate web site will enhance our communications with investors and customers, enabling visitors to better understand the breadth of our business, our competitive advantages and future direction. We believe our website will serve as a natural extension of our Company's commitment to provide superior, environmentally sound products, services and solutions that allow our customers to meet their global needs, enable Met-Pro Corporation to grow and prosper, and provide long-term sustainable value to our shareholders."

Also included in this larger initiative are new websites for each of Met-Pro's individual business units including: Met-Pro Environmental Air Solutions (www.mpeas.com), Strobic Air Corporation (www.strobicair.com), Met-Pro Global Pump Solutions (www.mp-gps.com), Mefiag Filtration (www.mefiag.com), Keystone Filter (www.keystonefilter.com), and Pristine Water Solutions Inc. (www.pristinewatersolutions.com). Each website is accessible via met-pro.com, or through its own dedicated web address.

These new sites are now live, and can be found at: www.met-pro.com

About Met-Pro

Met-Pro Corporation, with headquarters at 160 Cassell Road, Harleysville, Pennsylvania, is a leading niche-oriented global provider of product recovery, pollution control, fluid handling and filtration solutions. The Company's diverse and synergistic solutions and products address the world's growing need for clean air and water, reduced energy consumption and improved operating efficiencies.
